This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Prudential Committee.—Superintendent, D. H. Merriam, E. P. Monroe.

The Public or Common Schools consist of what are denominated the High School, Grammar, Intermediate, Secondary, Primary and Ungraded Schools. The arrangement is designed to furnish a regular gradation of schools and system of instruction.

To the High School, scholars from all parts of the town are admitted upon their appearing, from examination, to possess the requisite qualifications. The examination for admission takes place at the end of the summer term.

This School affords to scholars the means of acquiring a systematic and thorough education, or, if they desire it, of fitting themselves to enter college.

The Grammar Schools—one on High street, one on Day street, and one at West Fitchburg—are kept by male, assisted by female teachers.

In the High Street school, three assistants are employed, in the Day Street, four, and in the West Fitchburg, one. Scholars from all parts of the town, possessing the required qualifications, are entitled to attend some one of these schools.

The regular time for the transfer of scholars from schools of a lower to those of a higher grade, is at the commencement of the Fall Term.

The High and Grammar schools are kept forty weeks each in a year, in three terms.

The schools of lower grade are divided, so far as practicable, into three grades—Intermediate, Secondary and Primary—and are kept three terms in each year.

FITCHBURG MUTUAL Fire Insurance Company.

FITCHBURG, MASS.

The business of this Company is done in two classes, each of which is solely responsible for its own losses.

In the FIRST CLASS, property of the safer kinds is insured. Dividends of *sixty per cent.* on the original premiums are paid on Policies that have run over one year, and on one year Policies, *forty per cent.*

The Cash Assets in this Class are about $134,000.00, and the amount of Property at risk is about $15,000,000.00.

In the SECOND CLASS, Property of a more hazardous kind is insured, and the safer risks are taken at a lower rate than in the First Class. At present, no dividends are paid in this class, but it has Cash Assets of about $50,000.00, with about $1,000,000.00 property at risk.
